

Woodland Herbs Dispensary & Dried Herb List

At Woodland Herbs we try to stock a wide range of different herbs, focussing mainly on the European tradition of herbal medicine. Throughout the ages however there has been a large exchange of knowledge between cultures, regarding the use of herbs. Therefore herbs commonly used in Britain today originate from all four corners of the globe, from the common British dandelion, through the native American Echinacea, to the African Devils Claw.

We stock both dried herbs and herbal tinctures, and are happy to give advice on the use of medicinal herbs. In some circumstances however we may recommend talking to a qualified medical herbalist.

Many medicinal herbs are easily taken as a tea, made either as an infusion or as a decoction from the dried herbs. Our dried herbs are normally organic; however this is not always possible. Because of this (and the fact that the prices of herbs may change depending on their availability and the season) the prices overleaf should be used as a guide only. If you require your herbs to be organic then please indicate when ordering and we will confirm the organic status of each herb. If the herb you are looking for is not listed overleaf then please ask, we often have new herbs in stock. We offer a 15% discount when ordering 500grams or more of a single herb however this will be supplied in a large bag. We also stock approximately 200 herbal tinctures. You can order herbs online at www.woodlandherbs.co.uk or we offer a mail order service, please telephone for information, or to place an order. We accept all major credit cards.
